

HEAD ROTATION DEVICE DRT 210C

F - Miribel Technifor site

www.technifor.com

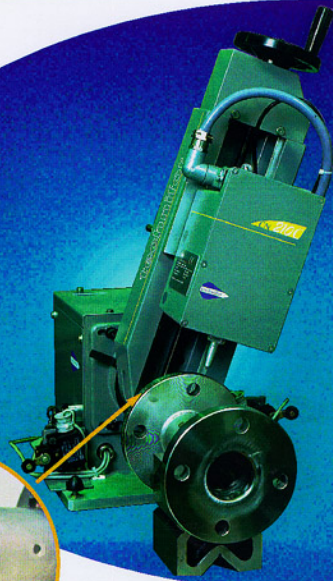

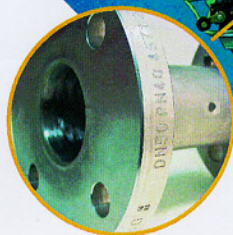

The DRT21 unit allows head rotation marking around a cylindrical piece

INDEPENDENT SOLUTION

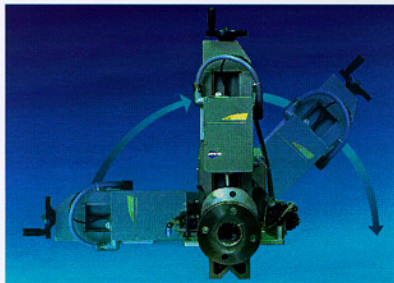

Linked to its control unit, the unit can function in independent mode or can be piloted by a command process.

MARKING PIECES OF LARGE DIAMETER AND OF LARGE INERTIA

- 10 to 300mm diameter on 180°
- Marking area: 45 x 45mm

DRT 210C : Head rotation device

180° rotation of the marking head around the piece to be marked

MARKING POSSIBILITIES

- Instantaneous computation of variables :
 - Batch numbering, time recording, incrementing numbers, dates and times
 - Specific variables
- Control of style of text:
 - Linear, angular, radial marking
 - Inverted, mirrored, reflected marking
 - Centering, compression, inclination, spacing of characters
- Geometric forms (square, line, circle, oval)
- Choice of fonts:
 - continuous lines, dot, 5x7, OCR
 - logos
- Downloading of customised fonts and logos
